KEY BENEFITS

Magnesium Phosphorus Protein	Reduced	Decreases urinary concentration of struvite constituents, magnesium, ammonium (from protein), phosphate.
Sodium	Controlled	Limits progressive loss of renal function.
Target urinary pH	Acid: pH 6.2-6.4	Discourages the formation and aggregation of struvite crystals.
Water	Increased in canned formulas	Increases urine volume, which dilutes struvite constituents. Lowers urinary specific gravity, to reduce recurrence of idiopathic FLUTD.
Superior antioxidant formula	Added	Reduces harmful free radicals to help combat urolithiasis.
