

Prescription Diet® i/d® Canine Gastrointestinal Health

Digestive Health Support

Dietary indiscretion, food allergies, or lack of digestive enzymes can affect your dog's digestive health. Efficient digestion is essential for your dog to be able to build and repair tissues and obtain energy, and for these reasons it is important to feed a food that is formulated to help support digestive health.

At Hill's, nutritionists and veterinarians have developed clinical nutrition especially formulated to help manage dogs with digestive health problems. Due to its easily digestible ingredients, Prescription Diet® i/d® may also be helpful for pets recovering from gastrointestinal upset and routine surgery.

WHERE TO BUY ▶

Key Benefits

Prescription Diet® i/d® is formulated with the following benefits:

- Highly digestible protein and fat to help **assimilate nutrients and repair tissues faster**
- Mixed fiber source to help **maintain gastrointestinal health**
- Optimal balance of nutrients to help **replenish the body and help encourage recovery**
- Added antioxidants to help control cell oxidation.

Additional Info

Hill's Prescription Diet® i/d® Canine is a complete and balanced food that provides all the nutrition dogs need. Please consult your veterinarian for further information on how our Prescription Diet® foods can help your dog to continue to enjoy a happy and active life.

Feeding Guide

Daily Feeding Guide:

Important Feeding Information

- **These amounts are a starting point only. Your dog may need less or more food to maintain proper weight. Adjust as needed. If you are unsure, or if you are feeding Prescription Diet® i/d® Canine Gastrointestinal Health to a puppy, ask your veterinarian.**
- With your veterinarian's approval, mix increasing amounts of your dog's new food with decreasing amounts of the old food over a 7-day period.
- Prescription Diet formulas are available in a wide variety of dry foods and treats for your dog's unique needs, and canned foods with delicious flavors your dog will love. Supplementation with other foods or treats is unnecessary and may decrease the effectiveness of the food. When using with canned food and treats, decrease the amount of dry food to avoid overfeeding.
- Split the recommended daily amount into smaller portions and feed throughout the day.
- **Keep fresh water available at all times!**
- For best results, have your veterinarian monitor your dog's condition.
- **To prevent suffocation, keep this plastic bag out of the reach of pets and children.**

Growth
