

Prescription Diet® k/d® Canine Renal Health

Kidney Health

Kidneys are very important because they remove waste substances from the blood, and maintain the normal balance of fluid and minerals within the body. Once kidney damage occurs, the consequences are usually irreversible.

Because the right nutrition can positively impact your pet's quality of life, Hill's, nutritionists and veterinarians developed Prescription Diet® k/d®, clinical nutrition especially formulated to support your dog's kidney health. In fact, k/d is clinically proven to improve quality of life in dogs.

WHERE TO BUY ▶

Key Benefits

Prescription Diet® k/d® is formulated with the following benefits:

- Reduced phosphorus to help **maintain healthy kidney function**
- Reduced levels of protein to help **reduce kidney workload**
- Reduced sodium to help **maintain normal blood pressure**
- Increased levels of omega-3 fatty acids to help blood flow to the kidneys
- Increased levels of B-complex vitamins to compensate for vitamin losses in the urine
- Added antioxidants to control cell oxidation and promote a healthy immune system

Additional Info

Hill's® Prescription Diet® k/d® Canine is a complete and balanced food that provides all the nutrition dogs need. Please consult your veterinarian for further information on how our Prescription Diet® foods can help your dog to continue to enjoy a happy and active life.

Feeding Guide

Daily Feeding Guide:

Important Feeding Information

- **These amounts are a starting point only. Your dog may need less or more food to maintain proper weight. Adjust as needed. If you are unsure, ask your veterinarian.**
- With your veterinarian's approval, mix increasing amounts of your dog's new food with decreasing amounts of the old food over a 7-day period.
- Prescription Diet formulas are available in a wide variety of dry foods and treats for your dog's unique needs, and canned foods with delicious flavors your dog will love. Supplementation with other foods or treats is unnecessary and may decrease the effectiveness of the food. When using with canned food and treats, decrease the amount of dry food to avoid overfeeding.
- **Keep fresh water available at all times!**
- For best results, have your veterinarian monitor your dog's condition.
- **To prevent suffocation, keep this plastic bag out of the reach of pets and children.**

Adult maintenance

Weight of Dog

Amount per Day

| | |
|----------------|---|
| 5 lb (2,3 kg) | 1/2 cup (50 g) - 5/8 cup (60 g) |
| 10 lb (4,5 kg) | 3/4 cup (75 g) - 1 cup (100 g) |
| 15 lb (6,8 kg) | 1 cup (100 g) - 1 3/8 cups (135 g) |
| 20 lb (9,1 kg) | 1 1/4 cups (125 g) - 1 3/4 cups (175 g) |
| 30 lb (14 kg) | 1 3/4 cups (175 g) - 2 1/3 cups (230 g) |
| 40 lb (18 kg) | 2 1/4 cups (225 g) - 3 cups (295 g) |
| 50 lb (23 kg) | 2 1/2 cups (250 g) - 3 1/2 cups (345 g) |
| 60 lb (27 kg) | 3 cups (295 g) - 4 cups (395 g) |
| 70 lb (32 kg) | 3 1/4 cups (320 g) - 4 1/2 cups (445 g) |
| 80 lb (36 kg) | 3 1/2 cups (345 g) - 5 cups (495 g) |
| 100 lb (45 kg) | 4 1/4 cups (420 g) - 5 3/4 cups (570 g) |
