

Prescription Diet® n/d® Canine

For nutritional support of dogs undergoing chemotherapy

Dogs going under chemotherapy have special nutritional requirements. Because their body has difficulties obtaining enough energy during this time, food needs to be high in energy and nutrients and in an appetizing form, to encourage the recovery process.

At Hill's, nutritionists and veterinarians have developed clinical nutrition especially formulated to help dogs undergoing chemotherapy.

WHERE TO BUY ▶

Key Benefits

Prescription Diet® n/d® is formulated with the following benefits:

- **Clinically proven to help improve quality of life for dogs undergoing chemotherapy**
- High level of protein to **meet energy demand and to avoid muscle wasting**
- High level of fat to increase caloric density and palatability to **help acceptance by inappetent pets**
- Low levels of carbohydrates
- High level of arginine and omega-3 fatty acids to help stimulate the immune system

Additional Info

Hill's Prescription Diet® n/d® Canine is a complete and balanced food that provides all the nutrition dogs need. Please consult your veterinarian for further information on how our Prescription Diet® foods can help your dog to continue to enjoy a happy and active life.

Feeding Guide

Daily Feeding Guide:

Important Feeding Information

- Use only as directed by your veterinarian, the expert on your pet's health needs. Cover and refrigerate unused portion.
- **These amounts are a starting point only. Your dog may need less or more food to maintain proper weight. Adjust as needed. If you are unsure, ask your veterinarian.**
- With your veterinarian's approval, mix increasing amounts of your dog's new food with decreasing amounts of the old food over a 7-day period.
- Prescription Diet® formulas are available in a wide variety of dry foods and treats for your dog's unique needs, and canned foods with delicious flavors your dog will love. Supplementation with other foods or treats is unnecessary and may decrease the effectiveness of the food.
- **Keep fresh water available at all times!**
- For best results, have your veterinarian monitor your dog's condition.

Adult maintenance - using 12.7 oz (360 g) can

Weight of Dog	Amount per Day
5 lb (2,3 kg)	1/3 - 1/2 can
