Prepare for your visit

- Have answers ready
  Have some basic info like your cat’s age, and any previous vaccinations, health issues or surgeries.

- Use a cat carrier
  Try and acclimate your kitty early on by placing treats and toys inside the carrier

- Enjoy the ride
  Avoid feeding your cat at least one hour before leaving to avoid car sickness

- Treat often
  In the waiting room, praise and treat your cat to help here feel comfortable

During the checkup

- Body Condition
  Does your cat go outside often? Expect a check for weight, parasites, etc.

- Joints & Mobility
  Reflexes will be tested. Your vet will ask about her activity level.

- Respiratory
  Does your cat wheeze or struggle to breathe?

- Oral & Digestive
  Any changes in appetite? Stool? Check for healthy teeth, gums and breath.

- Urinary
  Any accidents outside the litter box?

- Glands
  Expect a check of the lymph nodes, anal glands, etc.

Post-checkup questions

- Does anything seem unusual about my cat’s health?
- Any recommended changes to his food/diet?
- Any necessary vaccinations or follow-up visits?
